---

## SUMMARY

Computer science student and aspiring software engineer with skills in programming, web development, databases, and data analysis. Looking for an internship to gain real-world experience, contribute to meaningful projects, and grow my technical and problem-solving skills.

---

## EXPERIENCE

### Full Stack Development Intern

#### Future Interns

July 2025 - Present

- Building and testing web applications using technologies like HTML, CSS, JavaScript, React, and Node.js
- Collaborating on real-world projects to improve frontend and backend functionality
- Gaining hands-on experience in version control (Git), REST APIs, and responsive design

---

## PROJECT

### Kaamsevak

[github.com/madany044/kaamsevak-git](https://github.com/madany044/kaamsevak-git)

- KaamSevak is a web-based platform that connects daily wage workers with clients in need of services such as plumbing, carpentry, electrical work, and more. It enables clients to find, contact, and book skilled workers quickly and efficiently, improving accessibility for customers and increasing employment opportunities for workers.

### Online Car Rental Website (DBMS Mini Project)

[github.com/madany044/Online-car-rental-website.git](https://github.com/madany044/Online-car-rental-website.git)

- A DBMS mini-project: An Online Car Rental System built using PHP, MySQL, HTML/CSS/JavaScript. This project allows users to browse available cars, make bookings, and manage rentals.

### Phishing Website/URL Detection Using Machine Learning

[github.com/madany044/Phishing-Websites-URL-Detection.git](https://github.com/madany044/Phishing-Websites-URL-Detection.git)

- A machine learning-based phishing website detection system, designed to help users determine whether a given website URL is legitimate or malicious. This project raises user awareness, protects against third-party threats, and enhances online security. It achieves an impressive accuracy of ~96% using advanced machine learning techniques.

---

## EDUCATION

### Bachelor of Engineering

Mysuru Royal Institute Of Technology • 2026 • 8.1

---

## CERTIFICATIONS

### Data Analytics Job Simulation

Deloitte • 2025

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau , Used Excel to classify data and draw business conclusions

### Cybersecurity Analyst Job Simulation

Tata Forage • 2024

- Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.

### Machine Learning Fundamentals

Simplilearn • 2024

- Gained foundational knowledge of machine learning concepts, algorithms, and applications through hands-on exercises and real-world examples.

---

## SKILLS

Programming: Python , Java ( Basics )

Web Development : HTML, CSS , Responsive Web Design
